December 24, 2021 - Coub is YouTube for video loops. You can take any video, trim the best part, merge with other videos, add soundtrack. The end result is something very funny. Coub is not a website, but a service. It does not have an official website. This is an application for smartphones, which is essentially a program. But Coub works not only on smartphones, but also on desktops. The app is constantly evolving and improving. This year, for example, a system of recommendations appeared. Coub is powered by DeepLink technology created by Russian startup DeepNemo. How it works? First, the user uploads the video they want to embed in Coub.
