KEYMacro is a small utility that can macro virus and auto run files and folders on your Windows PC. It is a tool that make your life much easier because you can use it to run programs at scheduled times or on demand. With KEYMacro, you can run programs, open programs, open documents and folders, launch shortcuts, batch files, and even setup a shortcut to your My documents folder. Just add your batch and shortcut files to the KEYMacro Favorites folder and then simply launch your favorite batch file and shortcuts with one click. Moreover, you can also lock, hide, and even delete your favorite folders. You can also set your own message and icon to the opened file and folder. So, what are you waiting for? Let KEYMacro take you to the next level. Apollinario C. 10/18/2017 Rating It has a good GUI! it works pretty well. I like this product, the interface is excellent. What do you think about KeyMacro? I found it to be a very good product, and I can recommend it. Konstantin E. 10/16/2017 Rating Very user-friendly David L. 10/15/2017 Rating It does what it's supposed to do, which is to make life easy. But there are some things you need to know: (1) It does not run in the background, so if you cancel it, you have to kill the shortcut. (2) It does not support batch files, so you can't just run a list of files. (3) The interface is awkward and not intuitive. It's great that it does what you want it to, but there's a lot of room for improvement. George D. 10/12/2017 Rating This is a must-have for Windows users. In a few words, it makes your life easier. You can add a shortcut to your desktop, you can easily add a shortcut to your system directory, you can add a shortcut to a folder you create and you can run a batch file. The setup is simple. You add your favorite shortcuts, edit them and launch them at once. You can even create a shortcut for Windows to open your documents folder. I recommend this tool to all the users. How about KeyMacro? I found this product to be easy to use. 1d6a3396d6
