Adobe® Acrobat®  
Reader DC Adobe®  
Acrobat® Reader DC  
is Adobe's web-based  
Reader for its Portable  
Document Format  
(PDF) files. PDF is the  
standard document  
format for the print-on-  
demand publishing  
industry to exchange  
information and create  
files that are quickly

---

accessible on the Web or in a PDF-enabled application. Adobe Acrobat Reader DC allows users to open, view, save, print, email, and wirelessly transfer PDFs. Mobile devices have quickly become one of the most pervasive forms of computing, and this trend will only continue. These devices are used for many

---

reasons, but one very  
obvious reason is  
accessing, viewing, and  
editing digital content.

#### What's New In WebWrite Pro?

- Change texts, borders, images, backgrounds and tables in your HTML pages (more editing options).
- Insert links automatically between

---

the HTML tags (for example you can add a link after every four paragraphs and insert a link into the text of a file). ● Add images with most formatting options including resizing, copyright information, position and image delay. ● Set images as links (for example you can insert a link within the image at the click of a

---

button). ● Add existing images and pictures to your documents. ● Insert a list of files in a document. ● Create and edit HTML tables automatically (for example you can set borders for each row of a table). ● Add documents, web pages or pictures to an HTML document or page and edit properties for those elements. ●

---

Preview the page before editing using Internet Explorer's built-in browser. ● Use the mouse to click and drag to position objects. ● Save and overwrite an existing file. ● Create new files for each HTML page. ● Export HTML files in many different format (RTF, HTM, HTML, TXT, etc.) and any format supported by Internet

---

Explorer. ● Create new HTML files. ● Import HTML files and export to an Internet Explorer compatible document file. ● Create a web page with drop down menus and edit properties. ● Open and save text files as HTML or URL. ● Open and save selected HTML pages. ● Change the selection of the text and the font. ●

---

Add a comment to the selected section. ●

Change the text color, the background color

and the font. ● Get rid of the selected content (for example you can

remove content from a web page). ● Highlight

a part of the code or the entire document. ●

Highlight an entire paragraph or a section.

● Apply formatting to

texts. ● Preview

---

HTML files (for example you can see the HTML code of the page while editing). ● Create and edit an HTML page (for example you can insert a hyperlink in the document and edit the link's properties). ● Insert hyperlinks by typing text within the document. ● Set a link to another document by highlighting text in the

---

current document. ●

Get rid of a link (for example you can create a menu in the middle of the page). ●

Create a numbered list. ●

Create a bulleted list. ●

Combine a numbered list with a bulleted list.

---
