click on the desired feed for checking out its content.

Additionally, you can read the entire text via your default web browser. What's more, you are allowed to sort the feeds by unread or saved items or make the application display all items in the primary panel. You may mark the selected feed as read or unread, save it so you can read it later, as well as open it in your web browser. Plus, the tool lets you send the user-defined feed via your email client. Last but not least, you can copy data to the clipboard, so you can easily paste it into other third-party applications, perform search operations, refresh the information with just one click, set up the authorized accounts (add or delete them), as well as use hotkeys (they cannot be reassigned). Bottom line All in all, Meneré comes packed with some handy features for helping you check out your RSS newsfeeds via your Feedly or Fever account, and is suitable for all types of users, regardless of their experience level. #### **What's New In?**

★ Feedly is one of the most popular RSS readers for use on iOS, Android and on desktop. It's super-easy to setup, with a beautiful, intuitive interface that makes it a pleasure to use. The new "Discover Feed" section makes it easy to find & share new content from all over the web. ★ Fever is another popular RSS reader, especially for macOS users. Meneré takes its visual cues from Fever and makes it simple to view and read your feeds from desktop. Meneré makes it easy to filter your feeds by topics, label and type, and makes it quick and easy to send the selected feed via email. ★ Each RSS reader application has its own features, but Meneré offers more than the others. You can import feeds from all of the major RSS reader apps, including Feedly and Fever. You can also set Meneré to always look up new feeds, or only look up new feeds. You can even have Meneré read directly to your web
